DETAILED ACTION

Claims 2-4 and 117 are pending in the application.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on March 29, 2006 has been entered.

Election/Restriction

Applicants' election with traverse of Group II and the species of Example 11 (reproduced below) on pages

Art Unit: 1626

52-54 of the instant specification, in the reply filed on October 15, 2004 was acknowledged in the previous Office Action.

Example 11

The requirement was deemed proper and was made FINAL in the previous Office Action. On April 15, 2005, Applicants petitioned the Restriction requirement of August 16, 2004.

On July 13, 2005, the Petition of the Restriction requirement of August 16, 2004 was granted to the extent that all of the compound groups (i.e., Groups I-XI) would be combined into one group, hereinafter known

Art Unit: 1626

as modified Group I (claims 2, 3 and newly added claim 117, directed to compounds). The Petition grant also stated that an election of species was found to be proper and therefore, maintained and that the examiner is directed to follow the guidelines of M.P.E.P.

803.02. See bottom of page 4 and top of page 5 of the Petition grant of July 13, 2005.

The entire scope of the currently claimed subject matter of claims 2-4 and 117 has now been examined. Note, claim 4 has been rejoined with the elected invention and has now been examined. Applicant timely traversed the restriction (election) requirement in the reply filed on October 15, 2004.

Response to Amendment

The amendment filed March 29, 2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter

Art Unit: 1626

into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The deleted material which is not supported by the original disclosure is as follows: the amendment to the specification at page 16, line 32 to page 17, line 4. Specifically, the deletion of "beraprost", "fluprostenol", "limaprost", "misoprost" and "viprostol" from the specification.

Applicant is required to add these compounds back into the specification, in the reply, if any, to this Office Action.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1626

Claims 2-4 and 117 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, under the definition of when R_8 and R_9 taken together, the phrase "with the proviso that R_1 is an oxygen atom which is attached to the carbon atom at the position of the benzene ring defined by B" is indefinite since R_1 would not be directly attached to the benzene ring formed by R_8 and R_9 .

In claim 2, under the proviso in the definition of the K variable, the phrase "cycloalkyl mononitrate; a benzoic acid substituted benzyloxy mononitrate; the regioisomeric esters of glycerol dinitrate and oligomers thereof" makes claim 2 indefinite since three (3) nitrate groups must be present (see the proviso at the end of the claim).

Art Unit: 1626

Since claim 3 is directed to a compound, having the phrase "a mixture thereof" makes claim 3 indefinite and should be deleted.

Claim 117 is indefinite because the claim names known compounds then uses the language "comprising at least one NO group", which is: (1) improper Markush language; and (2) confusing since the known compounds do not have any NO groups. It is suggested that claim 117 be re-written (see format of claim 3).

Claim 117 is indefinite because it would appear that something is missing in the phrase "unoprostone or, through an oxygen atom, a nitrogen atom or a sulfur atom" (see end of claim).

Allowable Subject Matter

The elected species of Example 11 is allowable over the art of record.
